

The native viewer in Chrome will not display PDF files with forms, do the following to fix

- Click on the three dots to the right of the address bar
- Click Settings
- Click Advanced (Under "On startup")
- Click on "Site Settings"
- Scroll down under "Permission" and click on "PDF documents"
- Download PDF files instead of automatically opening them in Chrome (You have the option to automatically open pdf in Chrome or download pdf to open in your default pdf application)

Chrome version 76.0.3809
